

1 6T AI Servers in Stock in Norway

Article Overview

1.6T AI servers and compatible optical modules are available in Norway, with suppliers offering high-performance GPU servers and 1.6T transceivers for AI and HPC workloads.

Hardware and Components

For next-generation AI servers, 1.6T optical transceivers are available, such as the NADDOD OSFP-1.6T-2xDR4H, which supports 1.6Tb/s dual-port throughput and is compatible with NVIDIA/Mellanox switches. These transceivers are optimized for low-latency, high-density AI and HPC data center networks, supporting 2x800G DR4 transmission over eight parallel single-mode fibers, making them ideal for short-reach intra-data center deployments . Additionally, companies like SIVE are developing pluggable 1.6T optical modules for integration into AI servers, securing a critical position in the hardware ecosystem for NVIDIA AI chips .

Dedicated Server Providers in Norway

Several providers in Norway offer high-performance GPU servers suitable for AI workloads:

- DataPacket in Oslo provides GPU servers optimized for AI training, inference, and HPC, with flexible bandwidth plans up to 200 Gbps, low-latency connectivity, and in-stock availability. Their servers are located in a TIER III carrier-neutral data center with robust security and 24/7 technical support .
- HostAdvice lists multiple dedicated server providers in Norway, offering customiza...
