

100G Core Switch Test Report

Overview

In this report, Tolly engineers used Ixia's IxNetwork and IxExplorer test solutions to evaluate the Lenovo ThinkSystem & RackSwitch L2/3 10/25/40/100GbE Switch Family. performs at a high level, and is compatible with the target switch platform. Test Data all identification information accurately displayed in the outputs. By building test scenarios and simulating the customer's usage environment, we test whether the module's performance meets the customer's requirements. Prepare control. Juniper provides the JNP-QSFP-100G-CWDM optical transceiver, which supports 100G Ethernet transmission up to 2 km over single-mode fiber. The main focus of the project was to validate forwarding performance, energy efficiency, high-availability virtualization features, overlay networking, routing. Video-on-demand, voice-over-IP, cloud-based computing and storage have created a ravenous bandwidth appetite that is rushing deployment of 100 Gb/s technology. The power of High Speed Serial (HSS) technology, with its noise resistant differential signaling and jitter resistant embedded clocking.
