

10kW Photovoltaic Combiner Box

Article Overview

A 10kW PV combiner box typically costs between \$150 and \$400, with global shipping available from multiple suppliers depending on location and order size.

Cost Overview

The price of a 10kW photovoltaic combiner box varies based on features, quality, and supplier. Standard residential and small commercial models range from \$150 to \$400. Higher-end models with advanced monitoring, surge protection, and IP65 waterproof ratings may cost more. Combiner boxes generally account for 2.8–4.1% of total PV system costs, making them a small but critical investment for system safety and efficiency .

Key Features

- **Voltage and Current Ratings:** Commonly 600V DC for residential systems, with input currents per string ranging from 15A to 20A and output currents up to 63A .
- **Protection:** Overcurrent protection, surge protection, anti-reverse diodes, and circuit breakers for both DC and AC sides .
- **Construction:** IP65-rated enclosures, corrosion-resistant materials, and transparent covers for easy monitoring .
- **Compatibility:** Designed for 8–10kW solar inverters, supporting single-phase or three-phase systems .
