

48-port fiber optic patch panel in the computer room

Overview

The 48 port rack mount fiber patch panel is a 2U fiber enclosure designed to realize the connection between external optical fiber cables and pigtails, which is used for fiber splicing and patching. ABS injection-molded splice tray pre-loaded in the panel, Velcro Straps, Cable Ties, PG13. 5 water joint, Splice tubing, Adapters, 24 no's 2M Tight Buffer LSZH IEC 60332-1 Pigtails & Blanks. Patch panels are one of the best ways to manage an expansive local area network (LAN) by providing quick and easy access to the ports and connections that connect them altogether. They come in a range of sizes, and are typically mountable, whether that's on a wall, or on a rack to make for easier. Fiber patch panel is widely used in local telephone, agricultural network system, data, image transmission system and CATV cable TV series. A bulk (multi-strand) fiber cable enters the patch panel and then each fiber strand is separated into individual strands or pairs of strands.
