

Belize GRP Distribution Box Model

Article Overview

The Belize GRP Distribution Box is a robust, lightweight, and corrosion-resistant enclosure designed for industrial and outdoor electrical installations.

Material and Construction

Belize GRP distribution boxes are made from Glass-fibre Reinforced Polyester (GRP), which provides high impact strength comparable to metal enclosures while remaining lightweight and non-corrosive. These enclosures are UV-resistant, halogen-free, and suitable for a wide temperature range, making them ideal for harsh outdoor or industrial environments. The GRP material allows for easy machining without corrosion, and the boxes can be customized to specific dimensions and terminal configurations.

Design and Features

- **IP Protection:** Many GRP distribution boxes are rated IP67/IP68, ensuring protection against dust and water immersion, suitable for marine or wet environments.
- **Explosion-Proof Options:** Certain models, like those used in hazardous areas (Zones 1, 2, 21, 22), meet Ex protection standards, providing safety in flammable gas or dust atmospheres.
- **Doors and Access:** Options include single or double doors, plain or ribbed surfaces, and transparent covers for easy monitoring of installed equipment.
- **Mounting and Installation:** Boxes can be wall-mounted, plinth-mounted, or installed on the ground. Modular dimensions allow coupling multiple units together.
- **Internal Configuration:** Designed to house DIN-rail mounted terminal blocks, senso...
