

Botswana Long-Span Cable Tray Specifications

Article Overview

Large span cable trays in Botswana are designed for heavy-duty applications, supporting long spans and heavy cables with high corrosion resistance and modular installation options.

Materials and Construction

Large span cable trays are typically made from stainless steel (304/316), high-strength galvanized steel, aluminum alloy, or fiberglass reinforced plastic (FRP), providing excellent durability and corrosion resistance for indoor and outdoor environments . FRP trays are particularly suitable for highly corrosive or humid conditions, while steel options offer superior load-bearing capacity .

Types and Designs

- Ladder Type: Open design for maximum ventilation and heat dissipation.
- Channel Type: Solid or semi-solid for medium load applications.
- Perforated Type: Allows airflow and drainage while supporting heavy cables.
- Solid Bottom: Provides full protection for sensitive cables . Cable trays can be configured with straight runs, horizontal bends, tees, crosses, reducers, and vertical bends to accommodate complex routing .
