

Broadband Wired Fiber Optic Terminal Box

Article Overview

A fiber optic terminal box is a protective enclosure that organizes, terminates, and distributes optical fibers for residential, commercial, and enterprise networks.

Overview

A fiber optic terminal box (also called a Fiber Termination Box, Fiber Distribution Box, Fiber Access Terminal, or Optical Distribution Box) is designed to securely house fiber splices, connectors, and pigtails, providing organized management and protection for optical networks . These boxes are essential in FTTH (Fiber-to-the-Home), FTTB (Fiber-to-the-Building), and enterprise networks, ensuring reliable signal transmission and minimizing optical loss .

Key Features

- Capacity: Typically ranges from 2 to 48 fibers, with modular designs allowing expansion as network demand grows .
- Connector Compatibility: Supports SC, LC, FC, and ST adapters, with options for UPC or APC polish types .
- Splicing Support: Internal splice trays accommodate both fusion and mechanical splices, protecting fibers from mechanical stress .
- Mounting Options: Available in wall-mounted, pole-mounted, or desktop configurations, suitable for indoor and outdoor installations .
- Environmental Protection: Outdoor models feature IP65-IP67 sealing, UV-resistant...
