

Cable tray fixing clip U-shape

Article Overview

U-shaped clips are used to secure cables in trays or trunking systems by first fixing the clip to a surface or tray, then folding the tabs over the cables to hold them in place.

Types of U-Shaped Clips

- **Metal U-Clips:** Made from steel or corrosion-resistant materials, suitable for heavy-duty cable trays and high-temperature environments .
- **Plastic U-Clips:** Lightweight and ideal for non-metallic trunking or surface mounting, often used for smaller cable bundles .
- **Fire-Rated U-Clips:** Designed to withstand high temperatures ($>1200^{\circ}\text{C}$), suitable for fire performance cables and certified for safety .

Installation Steps

- **First Fix the Clip:** Attach the U-shaped clip to the cable tray, trunking base, or directly to the surface using screws, shot-fired nails, or fire-rated fixings depending on the clip type .
- **Insert the Cables:** Lay the cables into the U-shaped clip, ensuring they are properly aligned and not twisted.
- **Secure the Cables:** Fold the clip's tabs inward to hold the cables firmly in place. This prevents movement and maintains organization .
- **Spacing and Support:** Ensure clips are spaced according to cable weight and tray specifications. For wire mesh trays, supports are typically required every 8 feet to prevent sagging
