

Cable trays for explosion-proof rooms

Overview

Cable types such as Power Limited Tray Cable (PLTC) must be mounted in cable tray with listed fittings to meet the requirements. Let's break down what you need to know about explosion-proof requirements for cable trays in these environments, keeping it simple and clear. Chemical plants have risks like explosive gases, dusts, or vapors. It's serious business – around 15% of chemical plant explosions happen because of. Cable Trays have been permitted in the hazardous (classified) locations in the National Electrical Code for Class I (flammable vapor and gases) since the 1978 NEC and have been used extensively in chemical plants, refineries, and other types of facilities. Through systematic testing and advanced technological equipment, we ensure product quality. Cable trays for the safe and. Cable trays and busways at floor level or at slab penetrations shall have a waterstop no less than 50 mm in height. At slab penetrations, provide 20–30 mm of firestopping and install a fire-support plate at the top. For large. Our Products are designed to meet IECEx, ATEX, UL, and more Our products are tested to meet the highest standards for safety in hazardous areas Since 1996, Ex Industries has been delivering industry-leading products, technical support, and application assistance to hazardous location markets.
