

Calculation Table for the Cost of Galvanized Cable Trays

Article Overview

The cost of galvanized cable trays depends on material, finish, type, size, accessories, and installation, typically ranging from \$10 to \$30 per meter for steel trays.

Key Factors Affecting Cost

- Material and Finish
 - Hot-dip galvanized (HDG) steel is the most common choice for durability and corrosion resistance, costing more than pre-galvanized steel but offering longer life .
 - Stainless steel and aluminum trays are more expensive due to higher corrosion resistance and lighter weight, with stainless steel ranging from \$20 to \$100 per meter and aluminum \$20 to \$50 per meter .
- Tray Type and Size
 - Ladder trays are stronger and more expensive than perforated or wire mesh trays, suitable for heavy cable loads .
 - Standard lengths are usually 2.4 meters, and wider or deeper trays increase material usage and cost .
- Accessories and Fittings
 - Bends, reducers, connectors, and covers add to the total cost, typically priced per piece .
 - Heavy-duty trays designed for higher load capacities also increase the price
