

Can industrial switches assign IP addresses

Article Overview

Assign a static IP address to your industrial switch via the management interface or CLI to ensure reliable communication in industrial networks.

Step 1: Prepare for Configuration

- Connect to the switch: Use a console cable to connect your computer to the switch's Console port, or connect via the management Ethernet port if the switch supports web or SSH access .
- Gather credentials: Have the default or updated username and password ready.
- Check default IP: Many industrial switches come with a factory default IP (e.g., 192.168.1.254) if DHCP is not available .

Step 2: Access the Management Interface

- CLI method: Open a terminal program (like PuTTY) and log in to the switch console .
- Web interface method: Enter the switch's IP address in a browser and log in with credentials .

Step 3: Configure the IP Address

- Static IP assignment (recommended for industrial devices like PLCs, HMIs, and VFDs to ensure predictable communication), • Enter Global Configuration mode in CLI: configure terminal...
