

Central Asia Fireproof Cable Tray Specifications and Prices

Article Overview

Fireproof cable trays in Central Asia typically range from \$10 to \$50 per meter, depending on material, certification, and supplier location.

Price Range by Material and Type

- Galvanized steel trays: \$10–\$30 per meter, commonly used for standard fireproof applications and heavy-duty installations .
- Aluminum trays: \$20–\$50 per meter, offering corrosion resistance and lighter weight, often preferred for renewable energy or data center projects .
- Specialized certified fireproof trays: Premium European or Western-manufactured trays can exceed \$50 per meter due to advanced engineering, fireproof coatings, and project certifications .

Regional Market Considerations

- Imports and logistics: Central Asia relies heavily on imports from China, Russia, and Europe. Overland transport, customs, and certification requirements can add 20–40% to the base price .
- Local production: Kazakhstan and other countries produce standard galvanized trays at lower cost, but high-spec fireproof trays are often imported .
- Economic factors: Fluctuations in steel and aluminum prices, currency exchange rates, and energy costs influence final pricing
