

Complete set of distribution boxes for factory use

Article Overview

A complete set of distribution boxes includes pre-assembled enclosures with circuit breakers, busbars, terminals, and optional smart modules, ready for direct installation in residential, commercial, or industrial electrical systems.

Overview

A distribution box (DB box) is a central hub for electrical power distribution, ensuring safe and organized management of circuits. It protects against overloads, short circuits, and electrical hazards while allowing efficient power distribution to multiple circuits in homes, offices, factories, or industrial plants . Complete sets from factories often come pre-assembled, reducing installation time and minimizing wiring errors .

Components of a Complete Set

A factory-supplied complete set typically includes:

- Enclosure: Made from polycarbonate, ASA, or powder-coated stainless steel, providing impact resistance and protection against moisture and dust .
- Circuit Breakers and Fuses: Protect individual circuits from overloads and short circuits.
- Busbars and Terminal Bars: Pre-installed for live, neutral, and earth connections, enabling faster assembly .
- Indication Lights: Show mains power status and operational conditions....
