

Complete set of high voltage switchgear

Overview

This brochure showcases our comprehensive portfolio of high-voltage products: circuit-breakers, disconnectors and earthing switches, surge arresters, instrument transformers, coil products, bushings, and gas-insulated switchgear. Discover our advanced high-voltage switchgear solutions designed to ensure reliable performance and safety in power transmission systems. From air-insulated switchgear (AIS) to gas-insulated switchgear (GIS) and innovative hybrid switchgear, we offer a comprehensive portfolio to meet diverse. HT switchgears are essential high-voltage control and protection systems used in electrical networks operating above 1. In distribution systems, they can be used in ring network distribution systems as well as in dual power supply or radial terminal distribution systems. The switchgear is widely used in distribution stations and compact substations of load centers such as residential areas, high-rise buildings, large public buildings.
