

Cost of Western European Ladder-Type Cable Trays

Article Overview

Ladder-type cable trays in Western Europe typically range from €50 to €200 per meter, depending on material, load capacity, and finish.

Price Overview

Ladder-type cable trays, also known as cable ladders, are widely used for heavy power cable installations due to their open design and strong cross-member rungs . Prices vary based on:

- Material: Hot-dip galvanized steel, stainless steel, or aluzinc-treated steel are common. Stainless steel and aluzinc-treated trays are generally more expensive.
- Length and Width: Standard lengths are 3–6 meters, with widths from 100 mm to 600 mm. Longer or wider trays increase cost.
- Rung Type and Load Capacity: Perforated or solid rungs, hexagonal or flat profiles, and higher mechanical strength for industrial environments affect pricing .
- Environmental Class: Trays rated for higher corrosion resistance (C3–C4) or marine/industrial use are priced higher .

Typical Price Range

- Basic hot-dip galvanized steel ladder tray: €50–€80 per meter
- Heavy-duty industrial ladder tray (high load, perforated rungs, aluzinc-treated): €120–€200 per meter...
