

Cost of laying cables in vertical cable trays

Article Overview

The cost of laying cables along vertical cable trays typically ranges from \$5 to \$50 per meter, depending on tray material, type, and installation complexity.

Material Costs

The choice of cable tray material significantly affects the cost:

- Steel trays: \$5–\$25 per meter; strong and cost-effective for general installations .
- Aluminum trays: \$6–\$30 per meter; lightweight and corrosion-resistant, ideal for humid or industrial environments .
- FRP (Fiberglass Reinforced Plastic) trays: \$10–\$50 per meter; highly durable in aggressive environments .
- Stainless steel trays: higher-end, used for extreme corrosion resistance .

Tray type also matters: ladder trays are generally more economical and allow easier cable access, while solid bottom trays provide extra protection but cost more .

Installation Costs for Vertical Runs

Vertical cable tray installations are more labor-intensive than horizontal runs due to:

- Additional supports and brackets to secure trays vertically.
- Cable pulling and securing against gravity, which may require more manpower or...
