

Distribution Box System bv

Overview

The BV series consists of freestanding electrical distribution boxes mounted on a foundation. It's a solution for those who want to create a permanent power distribution point for 230V and 400V – in the garden, next to the house, on a construction site, or by an outdoor workshop. Vello Elektro has since 2001 been a reliable partner when it comes to portable power supply. The only one in the Benelux with a Dekra quality mark. Note: For the proper functioning of this online shop JavaScript is required! PCE specialises in the production of CEE industrial plugs and sockets, earthing contact plugs and sockets and supplies a complete range of rubber, metal and plastic distribution boxes. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices.
