

Distribution box surface color

Article Overview

The standard surface color for distribution boxes is typically light grey (RAL7035), but other colors like black (RAL9005), grey (RAL7032), or custom colors are also available depending on requirements.

Standard Colors and Customization

Most industrial and residential distribution boxes are finished with high-performance polyester powder coatings or electrostatic spray coatings, which provide durability, corrosion resistance, and uniform appearance . The default standard color is light grey (RAL7035), widely used for visibility, neutrality, and compliance with industrial norms . Other common options include black (RAL9005), grey (RAL7032), or custom colors to match branding or specific project requirements .

Surface Treatment and Quality

The surface color is not only about aesthetics but also reflects the quality of surface treatment. Key factors include:

- Uniform color: Ensures consistent appearance across the enclosure .
- Smooth lines and clear outlines: Achieved through precise bending, welding, and finishing processes .
- Durability: Powder coating or electrostatic spray provides resistance to UV, corrosion, and environmental wear .

Material Considerations...
