

Domestic Fiber Optic End-Face Inspection Instrument

Overview

The Wireless Fiber Optic End Inspection Instrument is a sophisticated device designed to assist technicians in inspecting fiber optic end faces with unparalleled precision. Featuring 200x magnification and high-resolution imaging, this instrument ensures detailed inspection results. Fiber optics is generally quite sensitive; tiny defects and even low levels of contamination on fiber endfaces can substantially degrade device and system performance. Since contamination or damage to the fiber end face can lead to signal attenuation, reflection loss, and unreliable connections, regular inspection and cleaning of the fiber end. The FI-7000 FiberInspector Pro is a fiber optic inspection scope that allows you to inspect and certify fiber optic connector end-faces in 1 seconds so you can get the job done the first time.
