

Double-sided bending cable tray production equipment

Overview

Cable tray manufacturing relies on a coordinated production line of specialized machines: a roll forming line shapes the profile, a CNC press brake handles secondary bending, a punch press creates mounting holes and ventilation slots, and a shearing line cuts the finished tray to length. Cable tray manufacturing relies on a coordinated production line of specialized machines: a roll forming line shapes the profile, a CNC press brake handles secondary bending, a punch press creates mounting holes and ventilation slots, and a shearing line cuts the finished tray to length. Together. The cable tray equipment we provide is brand new, advanced, mature, complete, safe and reliable, and its technical performance and functions meet the technical requirements. It minimizes energy consumption during continuous operation while maintaining fast cycle times. 5MM, product widths from 100 to 800MM, heights from 50 to 200MM, steel cable tray products of different specifications, tolerance requirements for length and width within (soil 1), angle $90^{\circ} \pm 2^{\circ}$ Product. High-precision cable tray bending machine designed for fast, accurate, and efficient bending of various cable trays.
