

EU Mesh Cable Tray Price List

Article Overview

The price of EU wire mesh cable trays typically ranges from €0.80 to €76 per unit depending on material, size, and supplier, with industrial-grade trays costing more for durability and compliance.

Price Overview

Wire mesh cable trays in Europe are priced based on material, dimensions, and finish. Common materials include stainless steel, galvanized steel, and aluminum, with stainless steel commanding higher prices due to corrosion resistance and long-term durability. Standard B2B prices for industrial applications range from €0.80 to over €76 per unit, depending on tray size, load capacity, and customization. Smaller consumer-oriented trays for office or home use are generally priced lower, around €15–€34, but these are less relevant for industrial projects.

Factors Affecting Processing Price

- **Material Type:** Stainless steel (SS304/SS316) is more expensive than pre-galvanized or aluminum trays due to higher corrosion resistance and compliance with EU standards.
- **Tray Dimensions:** Width, height, and mesh size influence the amount of material used and the complexity of manufacturing, affecting cost.
- **Coating and Finish:** Powder-coated or zinc-aluminum-magnesium coated trays offer enhanced corrosion protection, increasing the price by 10–50% depending on the coating technology.
- **Customization:** Special sizes, bends, or integrated accessories (like grounding holes or joints for thermal expansion) add to processing costs
