

Estonian Fiber Optic Cable Splicer Manufacturer

Article Overview

Hexatronic Tallinn and TALEXP OU are key Estonian facilities for fiber optic cable production and splicing equipment, though fully Estonian-made fusion splicers are not explicitly listed.

Hexatronic Tallinn

Hexatronic's Tallinn facility is the largest fiber optic termination house in the Baltic and Scandinavia, producing high-quality fiber optic assemblies and terminations since 2002 . While Hexatronic primarily manufactures fiber optic terminations and cable assemblies, it also collaborates with global partners to supply fusion splicers and related tools for network installation . The facility serves telecom operators, military, and power sectors across Estonia, Latvia, Lithuania, and Scandinavia.

TALEXP OU

TALEXP OU, based in Tallinn, is a distributor of modern materials and equipment for optical fiber cable production . They maintain a warehouse in Estonia and supply high-quality splicing tools, cleavers, and other fiber optic production equipment. While they do not manufacture splicers themselves, they provide access to advanced splicing technology for local installers and manufacturers.
