

Explosion-proof distribution box accessories and switches

Article Overview

Explosion-proof distribution box switch accessories include certified switches, push buttons, motor starters, cable glands, and control units designed for hazardous areas.

Key Accessories

Switches and Push Buttons: Explosion-proof switches and push buttons are designed to operate safely in hazardous zones, allowing control of motors, lighting, and other equipment. They are often ATEX, IECEx, UL, or CSA certified to ensure compliance with international safety standards . **Motor Starters and Safety Switches:** These accessories provide safe starting and stopping of motors in explosive atmospheres. Explosion-proof motor starters and isolation switches are manufactured according to IEC and ATEX standards, ensuring reliable operation in Zone 1 and Zone 2 hazardous areas . **Cable Glands and Connectors:** Explosion-proof cable glands and connectors maintain the integrity of the enclosure while allowing safe cable entry. They prevent sparks or arcs from escaping the enclosure, which is critical in flammable environments . **Control Units and Terminal Blocks:** Local control stations and terminal blocks are assembled within explosion-proof enclosures to organize and manage electrical circuits. These units are often made from stainless steel (AISI 304L or 316L) or GRP for durability in extreme temperatures and outdoor conditions .

Materials and Construction

Explosion-proof accessories are typically constructed from stainless steel, aluminu...
