

Explosion-proof on-site power distribution box

Article Overview

An Explosion-Proof Power Distribution Box is designed for use in hazardous areas, ensuring safe power delivery while preventing sparks or heat from igniting flammable surroundings.

- These boxes are rugged enclosures that meet safety standards such as ATEX and IECEx, making them suitable for various industries including oil and gas, chemical, and manufacturing .
- They are often waterproof and dustproof, with certifications like IP66, ensuring durability in challenging environments .
- Specifications may include maximum current ratings, such as 180A for main switches and 100A for branch circuits .
- Applications include use in explosive gas environments and various flammable sites, making them essential for safety in industrial operations .

For more detailed specifications, you can refer to the respective manufacturers' websites.
