

External cable tray support

Article Overview

External cable trays can be supported using brackets, hangers, trapeze systems, and prefabricated support solutions designed for various load capacities and environmental conditions.

Types of Cable Tray Supports

1. Wall-Mounted Brackets: Wall brackets, also called stand-off brackets, are used to mount cable trays at a fixed distance from walls or vertical surfaces. They are available in various sizes (50mm to 300mm) and materials such as pre-galvanized or hot-dipped galvanized steel, providing strength, rigidity, and corrosion resistance for outdoor or exposed installations . 2. G Hanger Overhead Support Brackets: These are designed for overhead support of cable trays, trunking, or baskets. They come in sizes like 100mm, 150mm, and 225mm, and are made from heavy-duty pre-galvanized steel. G hangers are ideal for horizontal runs and can be easily installed to support medium to large cable volumes . 3. Trapeze Support Systems: Trapeze brackets consist of a horizontal bar suspended by two vertical rods, providing robust support for wide or heavy cable tray runs. Pre-assembled trapeze supports are available for quick installation and can accommodate various tray widths and drop lengths, making them suitable for external applications where multiple trays or services are combined . 4. Prefabricated Modular Supports (e.g., Roof-Pro DPK): For large-scale or high-volume cable runs, prefabricated supports like Roof-Pro DPK systems offer adjustable widths (1000mm, 1500mm, 2000mm) and pivoting legs. These supports can carry multiple services, including cables, ducts, and pipes, in a single structure. They are designed for long-term durability and cost-effective installation on external sites . 5. TAB-C Supports: For smaller cable volumes, TAB-C...
