

Fiber Optic Cable Line Construction Quotation List

Article Overview

A comprehensive fiber optic cable construction quotation should include material costs, civil works, installation labor, passive network components, documentation, and logistics, with typical cable costs ranging from \$0.05 to \$6 per foot depending on type and installation method.

Material Costs

Fiber optic cable prices vary widely based on type, strand count, and construction:

- Single-mode fiber: \$0.10–\$0.50 per foot for standard outdoor cable; indoor simplex/duplex cables can be \$0.05–\$0.30 per meter .
- Multimode fiber (OM1/OM2/OM3/OM4): \$0.10–\$0.60 per meter .
- Armored or direct-burial cables: \$0.30–\$5 per foot depending on environmental rating and protection .
- High-count backbone cables (e.g., 288 strands) can reach \$6 per foot . Bulk purchases often reduce per-foot costs by 20–40%, and pre-terminated assemblies or patch cables incur additional costs due to factory termination .

Installation and Civil Works

Installation costs depend on method and location:

- Underground duct installation is more expensive than aerial or indoor runs
