

Fiber Optic Displacement in Senegal

Overview

Senegal's fiber optic network coverage is projected to reach 65% by 2026, enhancing internet speeds nationwide. Between December 2020 and December 2024, the number of lines increased from 177,363. 26% growth is the result of improved infrastructure, thanks to massive investments in fiber deployment and Fixed Wireless Access (FWA), which have supported growing demand. This page contains more information about the Fiber Optic Cable System, a specific investigation on how cellular activity might be used to map poverty at high resolution, and a brief history of telecom in Senegal to give the analysis context. Mobile data is incredibly popular in Senegal. There are. The freshest signal is Sonatel's commissioning of the 2Africa submarine cable in December 2025, a 45,000 km system rated at 180 Tbps that is Senegal's fifth international landing and forces a matching domestic fibre build-out. This guide covers the equipment lines a supplier actually quotes, the.
