

Fiber optic cable removal cost

Article Overview

The cost of removing or terminating fiber optic cables typically ranges from \$1 to \$3 per foot, depending on cable type, access difficulty, and labor requirements.

Cost Breakdown

The total cost of fiber optic cable removal depends on several factors:

- **Labor:** Skilled technicians are required for safe removal, splicing, and testing. Labor rates typically range from \$1.00 to \$3.00 per foot, with higher rates for difficult access or outdoor installations .
- **Materials and Equipment:** Removal may involve connectors, splice closures, patch cables, and specialized tools like fusion splicers or OTDR testers. Equipment rental or purchase can add to the cost .
- **Permits and Access:** Urban areas may require permits, road or sidewalk closures, or right-of-way approvals, which can increase costs .
- **Cable Type:** Single-mode fiber is generally more expensive to handle than multimode fiber due to precision requirements .
- **Termination Method:** If the removal involves terminating the cable for reuse, methods like fusion splicing are more costly than mechanical splicing or epoxy-and-polish techniques .

Typical Price Examples

- **Indoor, short runs ($\approx 1,000$ ft):** Basic removal and termination may cost around \$2,650–\$3,100, including labor, connectors, and minor permits
