

Fiber optic splice 2 cores available for immediate delivery

Article Overview

Indoor 2-core FTTH fiber optic termination boxes and splice enclosures are available for immediate delivery, supporting both mechanical and fusion splicing.

Recommended Products

1. Indoor FTTH Fiber Optic Termination Box (2 SC Ports, 2 Cores) This compact surface-mount box is designed for residential or office FTTH installations. It supports mechanical and fusion splicing, provides internal cable management, and maintains proper fiber bend radius. The box includes 2 SC ports for connecting subscriber patch cables and is compatible with LC duplex adapters, allowing up to 4-core splicing if needed. It features ABS plastic construction, multiple cable inlets, and a push-type cover for easy maintenance, making it ideal for wall-mount or desktop setups . 2. Fiber Splice Trays For more flexible or modular installations, fiber splice trays are available for 12, 24, 36, 48, and 72 fibers, compatible with brands like Corning, PLP, AFL, and Multilink. These trays hold fusion or mechanical splice sleeves and can be integrated into larger enclosures if future expansion is needed . 3. Pre-Assembled Splice Boxes Distributors like EFB-Elektronik offer pre-assembled or unassembled splice boxes with removable and stackable splice cassettes. These boxes provide secure fiber management, easy access to splices, and fast delivery. They serve as a reliable connection point between the installation cable and in-house network, ensuring stable operation .
