

Flame-retardant aerial optical cable

Overview

Certified to B2ca CPR and FE180 fire-resistance standards, these cables maintain optical integrity under extreme heat and flame exposure—ideal for tunnels, hospitals, airports, industrial plants, data centers, and railway networks. Corning FREEDM® One plenum cables are flame-retardant, UV-resistant, indoor/outdoor cables designed for aerial and duct applications with no need for a transition splice when entering the building. Offered in OM1, OM3 and OM4 multimode and OS2 singlemode, in 4, 8, 12 or 24 core fibre configurations. All feature a central loose tube construction and internal/external LSZH (Low Smoke Zero Halogen) sheath that also provides UV. Our fire resistant/fire survival cables feature a steel wire/steel wire braiding/corrugated steel tape armour to provide mechanical strength. Explore CommScopes Broadband Equity Access and Deployment Program for government funding. The FR RIO-WTC-SWR incorporates the leading-edge SpiderWeb Ribbon technology in a.
