

Flame-retardant type for distribution box panels

Overview

HDPE Flame Retardant Sheet is a specialized high-density polyethylene board engineered with fire-retardant additives that improve flame resistance while maintaining the material's durability, flexibility, and chemical stability. It is designed for industries that require a combination of fire. Enclosures for preventative fire protection, A2, F30/F90, I30/I90, E30/E90 Preventive fire protection is not only a matter for those constructing a building. In planning and designing their installations, expert electrical planners and engineers or switchgear manufacturers are responsible for. The Flameproof Distribution Boards/panels are used for the distribution of the power supply in a company. To handle high-rated power, it is necessary to use heavy equipment and components where the heavy power is switched on and off safely. Its smart design incorporates. Thorne & Derrick International, based in the UK, are the leading designers and suppliers of Control Panels & Distribution Boards for hazardous areas and explosive atmospheres from market-leading brand including Pepperl+Fuchs - a comprehensive range of Explosion Proof control panels are available. These are available in a range of materials including Stainless Steel, GRP & Sheet Steel from IP42 (Indoor) to IP 66 (Outdoor) Applications.
