

Grinding of fiber optic patch cords

Overview

PC is the most common grinding method for fiber optic connectors on fiber optic patch cords and is widely used in telecom operator equipment. It is also called fiber polisher. > Most of the local factories in China use this type machine, and the overseas repurchase rate for NEOPL-2000A is increasing year by year. The production of fiber optic patch cords involves the following steps: fiber optic preprocessing (cable cutting, winding, stripping), fiber optic ferrule assembly (inserting loose parts), glue preparation (mixing glue), ferrule glue injection. NEOPL-2000P is a new type of grinding machine with built-in software and PLC control system. Prepare Tools and Consumables: Polish Machine, Polish Pad, Polish Film, Polish Jig, Polish Oil, Fiber Cutting Pen 1.
