

How are the sales of 800g optical modules

Overview

The global 800G optical module market was valued at \$4.8 billion in 2025 and is projected to reach \$28.1 billion during the forecast period from 2026 to 2034, driven by the rapid acceleration of artificial intelligence. NEW · LIVE DASHBOARD This report is now a living dashboard with 16 analysis modules, refreshed quarterly, with alerts and a what's-changed layer — every license includes 12 months of access. An 800G Optical Module refers to a high-speed optical transmission module used in data centers. After explosive growth in 2024, 800G Datacom optics for AI and general computing applications will be the fastest growing segment of the market in 2025, according to the latest Optical Components Report from research firm Signal AI. 6T optics will enter volume production in select Nvidia and. According to the latest June 2025 Quarterly Market Update by renowned research firm LightCounting, the global optical transceiver market is set to rebound in Q2 2025 with a projected 10% quarter-over-quarter growth.
