

How many years is the warranty for galvanized cable trays in Africa

Article Overview

The typical warranty for galvanized cable trays ranges from 5 to 15 years, depending on the type of galvanization, environmental conditions, and maintenance practices.

General Warranty Period

For standard galvanized steel cable trays, manufacturers usually offer a warranty of 5–10 years, depending on the thickness and quality of the zinc coating and the expected environmental exposure. Hot-dip galvanized trays, which have a thicker protective layer, generally come with a 10–15 year warranty and are more resistant to corrosion, making them suitable for outdoor or humid conditions common in many parts of Africa.

Environmental Factors

The warranty period can be significantly affected by the installation environment:

- Indoor, dry environments: Galvanized trays can last up to 10 years or more with proper maintenance.
- Outdoor or humid environments: Exposure to moisture, coastal air, or industrial pollutants can reduce the effective lifespan, often limiting warranties to the lower end of the range (5–10 years) unless hot-dip galvanization is used.
- Highly corrosive areas: Chemical plants, marine installations, or areas with high humidity may require additional protective coatings or alternative materials like sta...
