

How much does an 8-core overhead optical cable cost

Article Overview

An 8-core fiber optic cable typically costs between \$0.09 and \$6 per foot, depending on type, protection, and purchase volume.

Price Overview

The cost of an 8-core optical cable varies widely based on fiber type, strand count, jacket material, and installation environment. For bulk or wholesale purchases, prices generally range from \$0.09 to \$1.52 per foot, while retail prices can be \$1 to \$6 per foot for standard cables . For example, a 1000-foot bulk cable may cost around \$0.57 per foot . Armored or outdoor-rated cables designed for harsh environments are at the higher end of this range, often \$0.50 to \$5 per foot .

Factors Affecting Cost

- **Fiber Type:** Single-mode fiber is more expensive per foot than multimode fiber but supports longer distances .
- **Cable Construction:** Indoor riser-rated cables are cheaper than plenum-rated or armored cables. Outdoor or overhead cables with steel or Kevlar reinforcement cost more due to durability requirements .
- **Installation Environment:** Overhead or aerial installations may be less expensive than underground runs, which require trenching, conduit, or protective ducting .
- **Quantity and Purchase Method:** Wholesale bulk purchases reduce per-foot cost, while pre-terminated or connectorized cables increase the price
