

How much does an aluminum cable tray cost now

Article Overview

Aluminum cable trays typically cost between \$20 and \$50 per meter, depending on type, size, and environmental requirements.

Price Range and Factors

Aluminum cable trays are more expensive than standard steel trays due to their lightweight, corrosion-resistant properties, making them ideal for outdoor, coastal, or chemically harsh environments. The typical cost per meter ranges from \$20 to \$50, though some sources report slightly lower ranges of \$6 to \$30 per meter for standard aluminum trays in less demanding conditions. Factors influencing the price include:

- Tray type: Ladder trays are generally more expensive than perforated or wire mesh trays because they support heavier cables.
- Size and thickness: Wider or thicker trays designed for high cable loads cost more.
- Surface finish: Coatings like powder coating or anodizing increase durability and price.
- Environmental exposure: Trays for outdoor or corrosive environments require higher-grade aluminum or additional protective finishes, raising costs.
- Project scale: Bulk orders or long runs can reduce the per-meter cost.

Comparison with Other Materials

- Steel trays: \$10-\$30 per meter; strong and cost-effective for indoor use
