

How much does an intelligent access switch cost

Article Overview

Intelligent access switches typically range from \$200 to \$3,000 or more, depending on features, port count, and brand.

Intelligent access switches, also known as managed access switches, are network devices that provide advanced features such as VLAN support, Quality of Service (QoS), security protocols like 802.1X, and sometimes Power over Ethernet (PoE) for connected devices. The cost varies widely based on specifications and vendor.

Price Ranges

- Entry-level managed switches: Small 8-24 port Layer 2 switches can cost \$200-\$600, suitable for small offices or branch locations .
- Mid-range switches: 24-48 port Layer 2/Layer 3 switches with PoE support typically range from \$600-\$1,500, ideal for medium-sized businesses or campus networks .
- High-end enterprise switches: Advanced Layer 3 switches with 48+ ports, high PoE budgets, and enhanced security features can cost \$1,500-\$3,000+, often used in large enterprise or data center environments .

Factors Affecting Cost

- Port Count and Speed: More ports and higher speeds (1G, 10G, 40G) increase the price.
- PoE Capability: Switches that provide PoE or PoE+ to power devices like IP cameras or phones are more expensive....
