

How to wire the copper switch in the distribution box

Article Overview

To wire a copper switch in a distribution box, connect the incoming live wire to the main terminal, attach the switch to the appropriate circuit breaker, and ensure proper grounding and secure connections.

Safety First

Before starting, turn off the main power supply to prevent electric shock. Use a voltage tester to confirm that no electricity is flowing in the circuit you will work on (). Wear insulated gloves and follow local electrical codes.

Step-by-Step Wiring Process

- Mount the Distribution Box Secure the box to a wall at an accessible height, ensuring it is free from obstructions ().
- Connect the Incoming Power Attach the incoming live wire (usually brown or red) to the main terminal of the distribution box. Connect the neutral wire (blue) to the neutral busbar and the ground wire (green/yellow) to the grounding busbar ().
- Install Circuit Breakers Place the circuit breakers in their designated slots. Each breaker will control a specific circuit in your building ().
- Wire the Copper Switch
- Connect the live wire from the main terminal to the input terminal of the switch.
- Connect the output terminal of the switch to the corresponding circuit breaker or outgoing circuit wire.
- Ensure the switch is properly rated for the load it will control ()....
