

# How to wrap fiber optic cable with tape and its price

## Article Overview

Use hook and loop tape like VELCRO® ONE-WRAP® or SPEEDWRAP® FIBERTie™ to safely bundle fiber optic cables, with prices ranging from \$1-\$5 per strap or \$20-\$50 per 25-yard roll.

### Wrapping Technique

- Choose the Right Tape: Use hook and loop tape specifically designed for fiber optic cables, such as VELCRO® Brand ONE-WRAP® or SPEEDWRAP® FIBERTie™. These tapes are gentle, reusable, and prevent pinching or damaging the fibers.
- Cut to Length: Measure the length needed to wrap around the cable bundle. You can cut the tape from a roll or use pre-cut straps.
- Bundle the Cables: Gather the fiber optic cables neatly without twisting or bending them sharply. Maintain the minimum bend radius recommended by the manufacturer.
- Wrap the Tape: Wrap the hook and loop tape around the bundle, overlapping slightly. The hook side will grip the loop side, securing the bundle without adhesives or tight compression.
- Adjust and Reuse: Hook and loop tapes can be opened and closed multiple times, allowing adjustments or reconfiguration of the cable bundle without damage.
- Color Coding (Optional): Many tapes come in colors like aqua, violet, yellow, or orange to match cable jackets for easier identification and organization.
