

Huijue Optical Cable Models and Specifications

Article Overview

Huijue optical cables are high-quality fiber optic solutions available in single-mode and multi-mode types, supporting G.652 and G.657A2 standards for telecom and data network applications.

Cable Types and Fiber Standards

Huijue optical cables include single-mode fibers (SMF) and multi-mode fibers (MMF), designed for indoor, outdoor, and flexible deployment scenarios . Common fiber standards supported are G.652 (standard single-mode) and G.657A2 (bend-insensitive single-mode), which ensure low attenuation and high reliability in FTTH (Fiber to the Home) and enterprise networks . Multi-mode options include OM1, OM2, OM3, and OM4, suitable for high-speed LAN and data center applications .

Core Counts and Construction

Huijue optical cables are available in various core counts, typically ranging from 2 to 12 cores for patch cords and higher counts for distribution cables . The cables are constructed with durable jackets, flexible inner tubes, and protective sheaths to withstand mechanical stress, environmental exposure, and bending during installation . Some cables feature butterfly or pull-out designs for easy handling and deployment in tight spaces .
