

Integrated dimming power supply manufacturer

Article Overview

Leading manufacturers of integrated dimming power supplies include Emitever, Infineon Technologies, Joyman Controls, and Monolithic Power Systems (MPS), offering solutions for LED lighting with DALI, 0-10V, and PWM dimming capabilities.

Key Manufacturers and Offerings

Emitever provides a wide range of LED drivers and dimmable power supplies suitable for indoor and large-scale lighting projects. Their products ensure reliable performance, precise dimming control, and long-term electrical safety, supporting multiple color temperatures and lumen outputs . Infineon Technologies specializes in dimming interface ICs, such as the CDM series, which integrate 0-10V dimming functionality in compact packages. These ICs allow high-accuracy PWM dimming without additional components, making them ideal for small-footprint LED designs . Joyman Controls offers evolving LED driver technologies with integrated dimming features, focusing on advanced product capabilities and continuous innovation in lighting control solutions . Monolithic Power Systems (MPS) manufactures robust AC-DC LED drivers with flexible dimming modes, fault detection, and compact form factors suitable for automotive and general lighting applications . Additional Options include multi-output LED power supplies with adjustable current and dual control interfaces, supporting DALI TYPE6, PWM, and constant current outputs. These products often feature DIN rail mounting and comply with Class 2 safety standards, providing up to 96W of power with long lifespans
