

Intelligent FOB Price for Hot Access to Data Centers

Article Overview

Intelligent FOB access systems for data centers typically cost \$500-\$5,000 per door upfront, with additional cloud or AI management fees ranging \$50-\$200 per door per month.

Cost Overview

Per-door hardware and installation:

- Basic FOB or key card systems start around \$500-\$2,500 per door, suitable for small facilities or low-traffic areas .
- Commercial-grade systems with enhanced security, audit trails, and durability can range \$3,000-\$5,000 per door, including hardware, labor, installation, and first-year licensing .
- AI-enhanced or edge-enabled systems for high-security environments, such as data centers, add \$300-\$800 per door for improved accuracy and anti-spoofing . Cloud and remote management:
- Cloud-based platforms reduce on-site server requirements but introduce subscription fees of \$50-\$200 per door per month, providing scalability, remote monitoring, and mobile credential integration .
- Mobile credential support can add \$200-\$500 per door, potentially reducing the need for physical FOBs or key cards . Additional considerations:
- Staff training and employee enrollment can cost \$500-\$2,000, especially for large teams
