

Intelligent Network Cabinet Integrated System

Overview

Integrated cabinet, also called intelligent cabinet or integrated intelligent cabinet, is a highly integrated intelligent cabinet serving IT equipment and applicable to a wide range of scenarios, which integrates the power supply system, intelligent system and monitoring system to ensure that the. Near-end cooling and high-efficiency power supply. The average annual PUE of the netcol5E is less than 1.5. These new strategies must include solutions that:
yyImprove energy efficiency, space utilization and IT productivity
yyOffer measurable savings in CAPEX and OPEX
yyOffer location flexibility and compatibility with existing infrastructure
yyImprove the ability to manage and control the IT. Today, network cabinets and enclosures are a central part of every IT infrastructure, driven by the rapidly increasing number of network interfaces. They provide a secure and efficient housing for both active and passive components such as servers, switches, data cables, patch panels, and UPS. Free from traditional cabinets, it can even be directly placed in the office area to save space! The “full rack” concept is fully modular. Integration design involving multiple subsystems
Intelligent cabinet system integrating power distribution, environmental monitoring, security control, and remote communication in one platform. Supports real-time monitoring of voltage, current, power, energy, temperature, humidity, door status, and alarm events. Enables local operation and remote.
