

Ireland Fiber Ethernet Switch QSFP28

Article Overview

QSFP28-enabled switches provide 100GbE connectivity over fiber, ideal for high-performance data centers and enterprise networks in Ireland.

What is QSFP28?

QSFP28 (Quad Small Form-factor Pluggable 28) is a hot-swappable transceiver standard that supports 100 Gigabit Ethernet by aggregating four 25 Gbps lanes, maintaining the same physical size as QSFP+ while delivering 2.5× higher bandwidth . It supports multiple optical variants, including SR4, LR4, and CWDM4, and can operate over single-mode or multimode fiber depending on distance and deployment requirements . QSFP28 modules also support breakout modes, such as 4×25G SFP28, allowing flexible network design .

Switch Options in Ireland

HPE Networking Comware Series 5720

- Ports: Hybrid SFP+ and 10GBASE-T, with 6 QSFP28 ports for 100G connectivity .
- Features: Distributed Resilient Network Interconnect (DRNI), HPE Intelligent Resilient Fabric (IRF), MACsec support, and VXLAN with EVPN for scalable, secure networks .
- Use Case: Suitable for leaf or access layer deployment in medium to large enterprise networks, offering high-density 1G/10G/100G connectivity .
