Are Distribution Board and Distribution Box the Same?

The electrical panel, often called the breaker box, functions as the distribution hub for a home's entire electrical system, controlling the flow of power and providing essential overcurrent protection. It serves as the central hub that distributes electrical power safely and efficiently across multiple circuits while protecting systems from overloads, short. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. Today, electrical systems are essential for homes and industries.
