

Large size charging pile distribution box

Article Overview

Large-size charging pile distribution boxes are specialized electrical cabinets designed to safely distribute, control, and protect power for EV charging stations in various environments.

Overview and Applications

Large charging pile distribution boxes are essential for power distribution, circuit control, and electrical fault protection in EV charging infrastructure. They are widely used in residential areas, commercial parking lots, public fast-charging stations, industrial sites, and construction projects (). These boxes ensure reliable operation of multiple charging piles simultaneously, supporting AC/DC chargers ranging from 7kW to 120kW ().

Structural Design and Features

- **Construction Materials:** Typically made from cold-rolled steel or stainless steel, with options for dustproof and waterproof ratings to suit indoor or outdoor installations ().
- **Protection Standards:** Many models meet IP30 for indoor use and IP65 for outdoor rainproof applications ().
- **Fire and Electrical Safety:** Advanced models integrate electrical fire-proof current-limiting protectors to prevent delayed short-circuit responses and arc fire hazards, complying with standards like GB 51348-2019 ().
- **Component Layout:** Designed for compact, scientific arrangement of circuit breakers, wiring, and protection devices, allowing easy maintenance and operation ()....
