

Metal mesh cable trays are affordable

Article Overview

Wire mesh cable trays typically cost between \$2 and \$25 per meter, depending on material, size, and finish.

Price Range and Factors

The cost of metal mesh cable trays varies widely based on material, coating, size, and supplier. Wire mesh trays are generally among the most affordable metal trays, ideal for lightweight cabling in offices or data centers . Typical prices range from \$2 to \$25 per meter, with stainless steel being the most expensive due to corrosion resistance, and galvanized steel offering a balance of durability and cost . Aluminum trays are lightweight and rust-proof but usually cost more than steel .

Coatings and Durability

Surface treatments affect both price and longevity:

- Hot-dip galvanized (HDG): Higher upfront cost but excellent outdoor durability .
- Powder coating: Protects against wear and allows color customization .
- Pre-galvanized: Cheaper but less durable in corrosive environments .

Installation and Additional Costs

The total cost includes more than just the tray:

- Labor: Skilled installation varies by region and complexity
