

# Mexican AI Server Company

## Article Overview

IAMEX, AI-GDC, and Foxconn Mexico are leading AI server companies in Mexico, providing sovereign AI platforms, GPU infrastructure, and large-scale AI services.

### IAMEX - I'AM Platform

IAMEX (Inteligencia Artificial de México) developed I'AM, the first national generative AI platform in Mexico, designed and operated entirely by Mexican specialists in data science and Python programming . The platform runs on NVIDIA H100, A100, RTX, and HGX B200 (Blackwell) servers, with an installed capacity of 6 megawatts, making it the largest AI infrastructure in Latin America . I'AM is trained on Spanish and Mexican cultural data, supporting applications in education, health, economy, culture, science, industry, agriculture, and government .

### AI-GDC - AI Factory

AI-GDC is a 100% Mexican AI infrastructure provider offering GPU-as-a-Service with 10MW of computational power and thousands of next-generation Blackwell GPUs . It enables companies to train, scale, and deploy AI models with low latency and high efficiency, providing services such as large language model creation, agentic AI, and advanced reasoning systems . AI-GDC emphasizes data sovereignty, automatic orchestration, and managed Kubernetes deployment, with infrastructure fully located in Mexico .
