

Monitoring System Industrial Switches

Overview

Managed, unmanaged and Power-over-Ethernet (PoE) IP20- and IP67-rated Industrial Ethernet Switches are robust and versatile, helping enable industrial automation and monitoring in challenging conditions subject to extreme temperatures, dust and moisture. In the field of industrial Internet of Things, security monitoring is a crucial part. Honeywell MICRO SWITCH basic switches are globally compliant and engineered in standard sizes with a wide variety of terminations, actuators, circuitries, and operating characteristics. As factories become more connected through IIoT and edge computing, maintaining consistent network performance is critical for both uptime and safety. Unlike. Monitoring devices perform numerous functions to protect people and machinery: At dusk, they switch on automatically, control the temperature or signal the location where a fuse has tripped.
