

Multi-hole trough-type cable trays are in ample stock

Article Overview

Multi-hole trough-type cable trays are widely available in stock, offering versatile, pre-perforated designs for efficient cable management and installation.

Overview and Benefits

Multi-hole trough-type cable trays, also known as perforated or ventilated cable trays, are designed with multiple holes along the bottom and sides to allow easy attachment of cables, improved ventilation, and reduced heat buildup. These trays support a variety of cables, including power, data, communication, and instrumentation lines, making them suitable for industrial, commercial, and offshore applications .

Key advantages include:

- Pre-punched holes for quick and secure cable attachment without drilling, reducing labor and installation time .
- Enhanced ventilation to prevent overheating of cables .
- Flexibility in routing with options for curves, slopes, and tees .
- Compatibility with accessories such as brackets, clamps, and covers for stable and organized installations .
- Material variety including stainless steel, galvanized steel, aluminum, and fiberglass (FRP/GRP) to suit different environmental conditions
